

Solder conveyor finger 06

SKU: 580-306NM

Features & Benefits

- ◆ Manufactured for use with Electrovert Wave Solder Carriers
- ◆ Made from high-quality titanium for durability and heat resistance
- ◆ Ensures smooth transport of PCBs during the soldering process
- ◆ Provides long-lasting performance in high-temperature environments
- ◆ Ideal for precision and high-reliability wave soldering applications

About the Solder conveyor finger 06

This Solder Conveyor Finger 06 is manufactured specifically for use with Electrovert Wave Solder Carriers.

Made from high-quality titanium, it offers exceptional durability and resistance to wear and heat, making it ideal for high-performance wave soldering applications.

The titanium construction ensures long-lasting performance while maintaining precision during the soldering process, enabling smooth and reliable PCB transport through the wave soldering machine.
