

# Solder conveyor finger 14

SKU: 580-313-NM

## Features & Benefits

- ◆ Designed for Blundell wave solder machines
- ◆ Available in two thickness options: 1.0mm and 1.5mm
- ◆ Made from high-quality materials for enhanced durability and heat resistance
- ◆ Ensures smooth, precise transport of PCBs through the soldering process
- ◆ Ideal for high-performance, high-volume soldering applications
- ◆ Provides long-lasting, reliable performance in demanding soldering conditions

## About the Solder conveyor finger 14

The Solder Conveyor Finger 14 is specially designed for use with Blundell wave solder machines and is available in two thickness options: 1.0mm and 1.5mm.

Manufactured for durability, this component ensures smooth and precise transport of PCBs during the wave soldering process. Built to withstand high temperatures and continuous use, it provides reliable performance and contributes to consistent soldering results in both high-volume and precision-based production environments.
