

Solder conveyor finger strip 33

SKU: 580NM

Features & Benefits

- ◆ Manufactured for Blundell carrier strip fingers
- ◆ All strips are 415mm in length
- ◆ Ensures smooth and precise PCB transport during the soldering process
- ◆ Ideal for high-performance, high-volume wave soldering applications
- ◆ Provides long-lasting, reliable performance under high-temperature conditions

About the Solder conveyor finger strip 33

The Solder Conveyor Finger Strip 33 is specifically manufactured for Blundell carrier strip fingers, with a consistent length of 415mm.

Designed for high durability, this finger strip ensures smooth and accurate transport of PCBs during the wave soldering process. It is perfect for high-volume production lines, providing reliable performance in demanding soldering environments.
