

# Spark Arrestor 2 - 76.5mm

SKU: 503-664

## Features & Benefits

- ◆ **Prevents Burning Particulates:** Effectively stops hot, burning particulates from entering the fume extraction unit.
- ◆ **Removable Drop-Out Chamber:** Safely collects burning debris, protecting the extraction system.
- ◆ **Durable Construction:** Made with high-quality stainless steel for long-lasting reliability.
- ◆ **Electrical Data:** 100-230VAC 1-phase, full load current of 0.5 amps for easy integration into most systems.

## About the Spark Arrestor 2 - 76.5mm

### The BOFA Spark Arrestor 2 - 76.5mm (3") Inlet/Outlet

The Spark Arrestor 2 is a vital safety accessory designed to prevent burning particulate from entering the fume extraction unit during laser marking processes.

By slowing down hot burning particulates through specially designed plates within the airflow, the unit helps to safely deposit them into a removable drop-out chamber.

This reduces the risk of damage to the fume extraction system, improving overall efficiency and safety. Constructed from durable stainless steel, the Spark Arrestor 2 is a reliable solution for protecting your equipment and maintaining optimal performance.

## Specifications

Property	Detail
Dimensions	670 x 415 x 535mm for a compact, space-efficient design
Weight	40.5kg, providing stability and secure installation
Application	ESD-protected areas, electronics mfg, cleanrooms
