

Spray Bottle ESD

SKU: G-SCB | Sizes: 250ml Spray Bottle - YELLOW, 500ml Spray Bottle - BLUE

Features & Benefits

- ◆ ESD safe spray bottle made from antistatic polyethylene
- ◆ Available in 250ml Yellow and 500ml Blue size options
- ◆ Ideal for cleanroom use and EPA environments
- ◆ Dissipative bottle for effective static control

About the Spray Bottle ESD

This ESD safe spray bottle is made from antistatic polyethylene, providing reliable protection against electrostatic discharge in sensitive environments.

Designed for ease of use, it is easy to fill and operate, making it ideal for both cleanroom use and EPA (Electrostatic Protected Area) settings.

Available in two convenient size options – 250ml Yellow and 500ml Blue – this dissipative spray bottle ensures minimal static build-up during use.

The bottle is BPA-free and free of exthoxylated tertiary amines, offering a safer alternative to conventional plastics. With excellent resistance to alcohol, solvents, and other chemicals, it ensures durability in various industrial applications. Its surface resistance of $\leq 10E11$ ensures optimal performance in static-sensitive environments, and the bottle is made from homogeneous-type antistatic polyethylene for consistent and reliable electrostatic control.

Specifications

Property	Detail
	<i>BPA-free and free of exthoxylated tertiary amines for safer use</i>
	<i>Good resistance to alcohol, solvents, and other chemicals</i>
	<i>Surface resistance $\leq 10E11$ for optimal electrostatic control</i>
	<i>Made from homogeneous-type antistatic polyethylene for consistent quality</i>
Application	ESD-protected areas, electronics mfg, cleanrooms
