

Standard - Conductive Flat Brush 37mm ESD

SKU: 107-173

Features & Benefits

- ◆ Polypropylene handle for strength and comfort
- ◆ Nylon bristles for safe and gentle cleaning of ESD-sensitive components
- ◆ Surface resistance between 1.104Ω and 1.109Ω, providing optimal ESD control
- ◆ Temperature range from 5 to 105°C, with intermittent use recommended at the extremes
- ◆ The brush features a polypropylene handle for durability and a nylon bristle that is gentle yet effective

About the Standard - Conductive Flat Brush 37mm ESD

Standard - Conductive Flat Brush 37mm ESD is the ideal solution for cleaning ESD-sensitive assemblies without the risk of generating harmful static charges.

Designed to protect delicate electronic components, this brush ensures a safe and efficient cleaning process, reducing the likelihood of electrostatic discharge (ESD) damage.

The brush features a polypropylene handle for durability and a nylon bristle that is gentle yet effective. Its surface resistance falls between 1.104Ω and 1.109Ω, making it highly effective for ESD control. With a temperature range of 5 to 105°C and the recommendation for intermittent use at the temperature extremes, this brush is versatile enough for various environments. Conforming to ANSI/ESD S20.20 (1999) and EN 61340-5-1 standards, it is a reliable choice for professionals who require the utmost care in handling sensitive electronic parts.

Specifications

Property	Detail
Handle length	123mm
Application	ESD-protected areas, electronics mfg, cleanrooms
