About the Standard C.L. Workstation 1500mm

The C.L. Design (cantilever) workbench is designed to provide maximum manoeuvrability and flexibility, making it an ideal choice for assembly operations.

Its modular design allows for easy customisation, offering a wide range of options for upper and lower bench accessories.

This work station is equipped with 40mm location holes that accommodate rear support posts for all upper bench accessories, giving you complete control over your workstation setup.
