

Storage Box G-SK4 ESD

SKU: G-SK4-

Features & Benefits

- ◆ Ideal for **7" SMD reel component storage**, offering a dedicated solution for static-sensitive components
- ◆ ESD-safe storage box with an open front design for easy access to stored items
- ◆ Modular design allows for easy subdivision both lengthways and sideways for custom organisation
- ◆ Viewing panels, dust protection, and labelling capabilities for easy identification and secure storage
- ◆ ESD protection ensures safe handling and storage of static-sensitive items in assembly or production environments
- ◆ Ideal for use in static-controlled areas where electrostatic discharge (ESD) needs to be managed effectively

About the Storage Box G-SK4 ESD

The **G-SK4 Storage Box** is the ideal solution for storing and organising 7" SMD reel components, offering a practical and space-efficient way to manage static-sensitive items in an ESD-safe environment.

Designed for flexibility and functionality, this new generation of **ESD storage boxes with an open front** allows for easy access to components while ensuring maximum protection against electrostatic discharge (ESD).

The modular design of the box enables it to be subdivided both lengthways and sideways, offering the option to customise internal storage according to your needs. With additional features such as viewing panels, dust protection, and labelling capabilities, the G-SK4 box is perfect for organising electronic components in assembly areas or storage units. Ideal for use in static-controlled environments, this box combines excellent ESD protection with ease of use and great functionality.

The ESD-safe packaging box ensures your sensitive components remain protected from static, while options like viewing panels, dust protection, and labelling capabilities make organisation and identification simple.

Sized at **35 x 21 x 15 cm**, this storage box is the perfect choice for keeping your electronic components safe and easily accessible.

Specifications

Property	Detail
Size	35 x 21 x 15 cm, perfect for fitting into standard ESD shelving systems
Application	ESD-protected areas, electronics mfg, cleanrooms
