

# T15 Multiple Tip Extraction System

SKU: 503-502

## Features & Benefits

- ◆ **Multiple tip extraction** for up to 15 operators
- ◆ **High vacuum pumps** for efficient fume removal
- ◆ **Three-stage filtration process** with 99.97% HEPA filtration
- ◆ **Built-in silencer** for low noise levels
- ◆ **Filter warning indicator** for easy maintenance
- ◆ **Compact design** ideal for moving between workstations
- ◆ **Minimal installation** for quick setup
- ◆ **Solder iron tip extraction kit** (optional **CALL US**)
- ◆ **HSE and COSHH** compliant for a safe working environment
- ◆ This system is ideal for environments requiring extraction from up to 15 operators or extraction points, and it features a built-in silencer for extremely low noise levels

## About the T15 Multiple Tip Extraction System

**The BOFA T15 is a high-performance multiple-tip extraction system designed for all electronics hand soldering applications.**

With its high vacuum pumps and three-stage filtration, including 99.97% HEPA filtration, the T15 ensures the safe removal of fumes and debris generated during soldering.

This system is ideal for environments requiring extraction from up to 15 operators or extraction points, and it features a built-in silencer for extremely low noise levels. It's perfect for soldering iron tip extraction, vac pens, and micro-extraction.

The compact design and minimal installation make it easy to relocate in response to changing production layouts.

The unit comes ready to go with pre-installed filters, and you can order genuine BOFA replacements from us now or when required.

**CALL NOW TO ARRANGE YOUR ANNUAL LEV TESTING ON ALL BOFA PARTS**

### Compatible with:

- Pre Filter (5 pack)
- Combined HEPA/Gas Filter
- Solder Iron Connection Kit ESD
- Solder Iron Connection Kit NON ESD
