

TR 5000 R Flush Cutter

SKU: GT-TR5000-R

Features & Benefits

- ◆ Strong flush cutter for clean, precise wire cutting
- ◆ Flush cutting edge for minimal wire protrusion
- ◆ Medium head design for versatility and control
- ◆ Durable 5 mm steel construction
- ◆ Cuts copper wire up to Ø 2.00 mm
- ◆ Suitable for 12 AWG copper wire
- ◆ Ergonomic St. grip model for comfortable handling
- ◆ Ideal for electronics, assembly and production applications

About the TR 5000 R Flush Cutter

The Strong Flush Cutter is a durable, high-performance cutting tool designed for precision electronics assembly and general production use. Featuring a medium-sized head and flush cutting edge, it delivers clean, accurate cuts with minimal protrusion. Constructed from robust 5 mm steel and offering a cutting force of 8 kg, this cutter is capable of handling copper wire up to 2.00 mm (12 AWG), making it ideal for demanding workshop and manufacturing environments. The NEW Dolphin EVO handles combine improved ergonomics, a secure anti-slip grip and enhanced durability, delivering greater comfort, control and long-lasting performance.

Specifications

Property	Detail
Tool length	138 mm
Cutting force	8 kg
Application	ESD-protected areas, electronics mfg, cleanrooms
