

Toe Grounders Black ESD

SKU: G-ST-2

Features & Benefits

- ◆ Hardwearing toe straps designed for long-term ESD protection and use
- ◆ **Must be tested periodically using a footwear test station** to ensure effective grounding
- ◆ Provides essential personal grounding for personnel in ESD-sensitive environments
- ◆ Ideal for use in electronics manufacturing, assembly lines, and other ESD-critical applications

About the Toe Grounders Black ESD

The **Hardwearing Toe Grounder** is designed to provide reliable and long-term ESD protection for personnel in static-sensitive environments.

Engineered with durable materials, these toe straps are built for extended use and offer consistent grounding to prevent the build-up of static charges.

With a Resistance to Ground (RG) of $10^6\Omega$ to $10^7\Omega$, the toe grounder meets the stringent requirements of BS IEC 61340-5-41, ensuring compliance with ESD safety standards.

Perfect for use in electronics manufacturing, assembly lines, and other ESD-critical environments, the toe grounder is an essential part of any personal grounding system.

For continued effectiveness, the toe strap should be periodically tested using a footwear test station to verify its grounding performance.
