

Vision EVO Cam 360° Rotating Viewer Mk II EVR066

SKU: 507-289

Features & Benefits

- ◆ Full 360° rotation for enhanced observation of all angles around a subject
- ◆ 34° angle for viewing the base of vertical components or features
- ◆ Switch between rotating and conventional direct view for ultimate flexibility
- ◆ Integrated 8-point LED ring light for consistent, shadow-free illumination
- ◆ Objective lens included for clear, detailed inspections
- ◆ Perfect for a range of applications including electronics, mechanical, medical, and plastics inspections
- ◆ Compatible with EVO Cam systems (monitor and stand required but not included)

About the Vision EVO Cam 360° Rotating Viewer Mk II EVR066

The Vision EVO Cam 360° Rotating Viewer Mk II EVR066 is a powerful inspection accessory that enhances the EVO Cam system, offering full 360° rotation for a complete view around any subject.

With a 34° angle, it allows for detailed inspection of vertical components, enabling easy observation of areas that would otherwise be hard to reach.

Operators can easily switch between the rotating view and a conventional direct view for ultimate flexibility and convenience.

This viewer includes an integrated 8-point LED ring light and objective lens for optimal illumination, making it ideal for applications in electronics, mechanical, medical, and plastics components.
