

Vision EVO Cam System II - General Inspection configuration

SKU: 507-253

Features & Benefits

- ◆ Full-HD 1080p/60fps live video streaming for clear, high-definition imaging
- ◆ Magnification options up to 300x with full autofocus for ultra-sharp detail
- ◆ Stand-alone operation with direct image capture to a USB memory stick (no PC required)
- ◆ Simple, intuitive controls to view both whole samples and the smallest details
- ◆ High-quality, precision-engineered stand options for stability and optimal viewing
- ◆ Ideal for industrial, life science, and general inspection applications
- ◆ Exceptional optical performance with a wide range of objective lens options
- ◆ Flexible, powerful tool perfect for multiple users or production environments

About the Vision EVO Cam System II - General Inspection configuration

The Vision EVO Cam System II in the General Inspection configuration is a powerful full-HD digital microscope designed for a wide range of precision inspection tasks.

Offering stunning 1080p/60fps live video quality, it allows users to effortlessly inspect both large samples and fine details with magnifications up to 300x.

The system operates independently, with images captured directly to a USB memory stick—no PC required.

Featuring autofocus and exceptional optical performance, the EVO Cam simplifies magnification tasks, making it an ideal tool for industrial, life science, and production environments, while its intuitive design ensures minimal training is required.
