

Vision Lynx EVO - Low-profile ErgoStand EVO501

SKU: 507-260-1

Features & Benefits

- ◆ Magnification range from 6x to 60x, with a maximum of 240x
- ◆ Dynascope® eyepiece-less technology for ergonomic, fatigue-free operation
- ◆ Exceptional 3D stereo optics for stunning, high-resolution imaging
- ◆ Superior ergonomics to reduce strain and enhance productivity
- ◆ Ideal for intricate tasks requiring precision and accuracy
- ◆ Improves operator comfort and reduces errors in detailed inspection work

About the Vision Lynx EVO - Low-profile ErgoStand EVO501

The Vision Lynx EVO with the Low-profile ErgoStand EVO501 is an advanced, eyepiece-less stereo microscope designed for high-precision tasks that require exceptional 3D stereo viewing.

Powered by Dynascope® eyepiece-less technology, the Lynx EVO ensures ergonomic comfort by allowing eyes and hands to work in harmony, which reduces fatigue and enhances productivity.

With a magnification range of 6x to 60x (up to 240x with additional lenses), it delivers superior optical performance, making it ideal for intricate inspections and tasks requiring high-resolution, detailed views.

The Lynx EVO combines outstanding ergonomics with amazing 3D stereo optics for maximum accuracy and minimal operator strain.
