

Water Bottle ESD

SKU: G-SCB | Sizes: 250ml Water Bottle - YELLOW, 500ml Water Bottle - BLUE

Features & Benefits

- ◆ ESD safe spray bottle made from antistatic polyethylene
- ◆ **Available in 250ml Yellow and 500ml Blue size options**
- ◆ Ideal for cleanroom use and EPA environments
- ◆ Dissipative bottle for effective static control

About the Water Bottle ESD

The ESD safe water bottle is crafted from antistatic polyethylene, making it an ideal solution for cleanroom use and EPA (Electrostatic Protected Area) environments.

This dissipative bottle is designed to minimise static build-up, ensuring safe handling of liquids in static-sensitive settings. Available in two size options – 250ml Yellow and 500ml Blue – it is both easy to fill and use.

The bottle is BPA-free and free of exthoxylated tertiary amines, offering a safer alternative to traditional plastics. It boasts excellent resistance to alcohol, solvents, and other chemicals, making it durable and versatile. With a surface resistance of $\leq 10E11$, it ensures reliable performance in electrostatic protection applications. The bottle is made from homogeneous-type antistatic polyethylene, ensuring consistent quality and performance in a range of sensitive environments.

Specifications

| Property | Detail |
|--------------------|---|
| | <i>BPA-free and free of exthoxylated tertiary amines for safer use</i> |
| | <i>Good resistance to alcohol, solvents, and other chemicals</i> |
| | <i>Surface resistance $\leq 10E11$ for optimal electrostatic control</i> |
| | <i>Made from homogeneous-type antistatic polyethylene for consistent quality</i> |
| Application | ESD-protected areas, electronics mfg, cleanrooms |
