

# Weller ESF120ESD PCB Holder

SKU: GW-ESF120ESD

## Features & Benefits

- ◆ Clamping area max. 160x235mm, Double European format, for versatile use
- ◆ 360° pivoting range with 15° latching for precise positioning
- ◆ Steplessly adjustable side parts with clamping for flexibility
- ◆ Moveable arms with clamping pads for securing components during soldering
- ◆ High stability with integrated rubber feet to prevent movement during use
- ◆ Multi-sided clamping jaws for securing both round and square parts
- ◆ ESD-safe design to protect sensitive electronic components

## About the Weller ESF120ESD PCB Holder

The PCB Board Holder is a reliable and versatile tool designed to securely support and hold Printed Circuit Boards (PCBs) while you hand-solder components.

With a 360° pivoting range and adjustable side parts, this holder offers precise positioning and stability without the need for additional tools.

Ideal for both small and large boards, it can accommodate a clamping area of up to 160x235mm (Double European format), making it perfect for various soldering tasks.

The ESD-safe design ensures protection for sensitive components, while the rubber feet provide a high degree of stability during use.
