

Weller Fume Extraction attachment kit with tube Ø 6mm

SKU: GW-S-2003

Features & Benefits

- ◆ **Compatible with a variety of Weller soldering irons, including WSP 80, WP 80, MLR 21, WMP, WMRP, WP 120, and WP 65**
- ◆ **Helps maintain a safe and clean working environment by removing fumes directly at the soldering tip**
- ◆ **Simple and easy to install on Weller soldering equipment**
- ◆ **Includes all components necessary for a complete fume extraction setup**

About the Weller Fume Extraction attachment kit with tube Ø 6mm

This Fume Extraction Kit is designed to work with a wide range of Weller soldering irons, including the WSP 80, WP 80, MLR 21, WMP, WMRP, WP 120, and WP 65 models.

It provides an efficient and practical solution for removing soldering fumes at the source, ensuring a cleaner, safer workspace. The kit includes all necessary components for easy installation and effective fume extraction.

Kit Contains:

- **Extraction Tube** to direct harmful fumes away from the user
- **Tube Clip** for securing the extraction tube to the soldering iron
- **Hose** for flexible fume extraction
- **O-ring** to ensure an airtight seal and efficient fume capture
- **Cord Clip** for organising the components and securing them during use
