

Weller WP 200 Soldering Iron 200W

SKU: GW-WP200

Features & Benefits

- ◆ **Heat-up Time:** Quick 18 seconds from 50°C to 350°C (120°F to 660°F), ensuring faster soldering operations.
- ◆ **Tip Compatibility:** Works with XHT series tips, optimised for high-power applications.
- ◆ **Control Precision:** Lightning-speed temperature recording in the tip allows fast, precise response from the control electronics.
- ◆ **ESD Safe:** Built with electrostatic discharge protection, making it suitable for sensitive electronics.
- ◆ **Ideal for:** Industrial applications, working on large components, and heavy-duty soldering.

About the Weller WP 200 Soldering Iron 200W

The Weller WP 200 is a high-power soldering iron designed for large soldering joints and heavy-duty applications.

With 200W of power, this tool delivers exceptional performance, making it ideal for tasks such as working on transformers, LF shield plates, and engines. Thanks to the lightning-fast temperature response in the soldering tip, the WP 200 provides quick, precise adjustments, ensuring efficient and accurate soldering.

Compatible with **WT 1H power units**

Comes with **XHT D tip** - Tip type: **XHT series**

Ideal For:

- Heavy-duty applications requiring consistent, high temperatures for large joints.
- Transformers, shield plates, and engines that need high-performance soldering tools.
- Professional soldering tasks where precision, reliability, and speed are critical.

The Weller WP 200 provides superior power and control for demanding industrial and electronic soldering tasks, making it an excellent choice for professionals seeking reliable high-power performance.

Specifications

Property	Detail
Power	200W
Temperature Range	Adjustable from 50°C to 450°C (120°F to 840°F), providing flexibility for various soldering tasks
Voltage	24V
Application	ESD-protected areas, electronics mfg, cleanrooms
