- ◆ **Depositing rack** for easy nozzle storage

About the Weller WRK Reflow System - Chip Removal Kit

The WRK Desoldering System Chip Removal Kit is designed for the precise soldering and desoldering of large SMT components, up to 30x30mm.

Compatible with the HAP 200 Hot Air Pencil, this kit offers a comprehensive reflow system with a vacuum pick-up, perfect for efficiently removing SMD components.

With various nozzle sizes and a tripod pick-up for added stability, the WRK set ensures accurate, high-quality results, whether you're working on repairs or component replacements.
