

Weller WT1011M Soldering Set

SKU: GW-WT1011M

Features & Benefits

- ◆ **Compact and Space-Saving Design** The WT1011M is a single-channel soldering station with a compact footprint, ideal for workspaces where space is at a premium. It effectively handles nano and pico soldering tasks while ensuring your workspace remains uncluttered, efficient, and cost-effective.
- ◆ **Powerful Performance with RTP Tips** Equipped with Weller's RTP tips featuring active tip technology, the WT1011M provides extremely fast heat-up times (just 3 seconds) to maximise productivity. These tips offer superior heat retention and recovery, ensuring smooth and continuous workflows without delays.
- ◆ **Versatile and Flexible Compatibility** The WT1011M is compatible with a wide range of tools, including both active tip technology for high-performance applications and passive tip technology for more cost-effective tasks. This allows you to easily adjust the station to meet the needs of various projects, making it a versatile soldering solution.
- ◆ **Incredible Heat-Up Speed** With 3-second heat-up times, the WT1011M dramatically reduces waiting periods, allowing for quick start times and faster job completion. This quick heat-up and recovery time leads to increased productivity, reducing downtime and ensuring continuous soldering performance.
- ◆ **Multiple Tool Connections** The WT1011M offers the flexibility to connect up to 10 different soldering tools to a single station. Whether you need high-performance active tips for precision work or cost-sensitive tools for routine tasks, this soldering station provides unmatched flexibility.
- ◆ **Stackable Design for Efficient Workspace** The WT1011M soldering station can be stacked with other WT stations, reducing the clutter in your workspace while providing easy access to multiple stations for different tasks. The stackable design is perfect for those who require several tools but have limited space.
- ◆ **Health and Safety Features** To protect your health during soldering, the WT1011M can be connected to a Weller ZeroSmog fume extraction unit. This helps efficiently remove harmful fumes, creating a safer and more comfortable working environment.
- ◆ **Intuitive and User-Friendly Interface** The WT1011M features a graphical, backlit LC display with an intuitive, easy-to-navigate menu structure. The user-friendly interface ensures that even complex soldering tasks can be completed quickly and easily. Additional features like OFF time, process window, lock function, and offset provide complete control over the soldering process.
- ◆ **Space-Saving and Convenient Storage** The housing cover of the WT1011M can be used as a storage area for tools, reducing the need for extra space and keeping your workspace tidy. The stackable design further enhances storage efficiency.

About the Weller WT1011M Soldering Set

Weller WT1011M - 1 Channel Nano/Pico Soldering Kit (95W) – Compact, Powerful, and Versatile for Precision Soldering

The Weller WT1011M Nano/Pico Soldering Kit is a highly versatile and compact soldering solution designed for nano and pico soldering applications. Whether you're working on small components, delicate micro circuits, or high-precision tasks, this 95W soldering station delivers fast, reliable, and efficient performance. With ultra-fast heat-up and recovery times, it's the perfect tool for professionals who demand top-notch performance without compromising on space or flexibility.

Specifications:

- **Power Consumption:** 95W
- **Temperature Range:** 50°C - 450°C / 550°C (depending on tool)
- **Temperature Accuracy:** ±9°C
- **Temperature Stability:** ±2°C
- **Voltage:** 230V / 50Hz
- **Fuse:** 230V (mA)T500
- **Dimensions (L x W x H):** 150 x 130 x 101 mm
- **Weight:** 1.9 kg
- **Mil-Spec:** Yes
- **ESD Safe:** Yes
- **UPC:** 4003019449323

Perfect For:

- Nano and pico soldering applications
- Electronics repairs and prototyping
- Precision soldering for delicate components
- Hobbyists, technicians, and engineers
- Workshops and labs with limited space

The Weller WT1011M Nano/Pico Soldering Kit is your ultimate partner for precision soldering in the most demanding applications. Its fast heat-up times, compact design, and versatile functionality make it an essential tool for professionals who need reliable performance and unmatched flexibility.

Order the Weller WT1011M today and experience the power of high-performance soldering!
