

Weller WT2023M Soldering Set

SKU: GW-WT2023M

Features & Benefits

- ◆ **Dual-Channel Capability for Simultaneous Work** The WT2023M features two channels, allowing you to use two soldering tools at once. This feature is especially valuable for professionals handling complex rework tasks, enabling you to perform micro and standard soldering or desoldering simultaneously, improving workflow and saving valuable time.
- ◆ **Fast Heat-Up and Recovery Times** With Weller's RTM and RTW active tips, the WT2023M achieves fast heat-up times of just 5 seconds. This rapid heating ensures minimal waiting time, enabling faster start-up and smoother project flow, which translates to greater overall productivity and efficiency.
- ◆ **Powerful Active Tip Technology for Precision** The WT2023M uses Weller's RT tips with active heat technology, providing consistent and reliable heat for all your soldering and desoldering needs. These tips deliver quick, precise, and controlled heating, ensuring superior performance and reducing the risk of overheating or damage to sensitive components.
- ◆ **Exceptional Flexibility for Various Tasks** The WT2023M supports both nano and micro applications, offering exceptional versatility. It integrates seamlessly with active tip technology for both new tools and passive tip technology for existing tools. This flexibility ensures a tailored solution for any task, whether you're working with fine components or larger soldering applications.
- ◆ **Multiple Tool Connections for Maximum Efficiency** The WT2023M allows you to connect over 10 different soldering tools to one station, maximising efficiency and saving space. Whether you need high-performance active tips or cost-effective tools, the WT2023M can handle it all, providing the flexibility you need without requiring multiple separate stations.
- ◆ **Compact, Space-Saving Design** Despite its powerful capabilities, the WT2023M maintains a compact footprint, allowing you to save space on your workstation. The stackable design makes it easy to organize multiple units and tools without clutter, ensuring that you have a streamlined and efficient workspace.
- ◆ **Health and Safety Focus** The WT2023M can be connected to a Weller ZeroSmog fume extraction unit to safeguard your health during soldering. The fume extraction system helps to remove harmful fumes and particulates, ensuring a cleaner and safer work environment.
- ◆ **Intuitive User Interface** The WT2023M features a graphical, backlit LC display for easy viewing of settings and real-time adjustments. The intuitive menu structure ensures that users of all skill levels can navigate and configure the station quickly and efficiently, enhancing ease of use.
- ◆ **Storage-Friendly Design** The WT2023M is designed with a housing cover that can be used for tool storage, helping keep your workspace neat and organised.

About the Weller WT2023M Soldering Set

Weller WT2023M - 2 Channel Rework Kit (150W) for Micro & Standard Soldering and Desoldering Tasks

The Weller WT2023M is a dual-channel rework soldering station designed to streamline your workflow and boost productivity. Perfect for handling micro, nano, and standard rework applications, this 150W soldering kit offers outstanding flexibility, fast heat-up times, and powerful performance to help you tackle a wide variety of soldering and desoldering tasks efficiently. Whether you're working on small components or larger micro applications, the WT2023M ensures precision, speed, and reliability, making it the ultimate tool for professionals and enthusiasts alike.

Specifications:

- **Power Consumption:** 150W
- **Temperature Range:** 100°C - 450°C / 550°C (depending on tool)
- **Temperature Accuracy:** ±9°C (±17°F)
- **Temperature Stability:** ±2°C (±4°F)
- **Voltage:** 230V / 50Hz
- **Fuse:** T 0.8
- **Mil-Spec:** Yes
- **Dimensions (L x W x H):** 150 x 130 x 101 mm
- **Weight:** 1.9 kg
- **ESD Safe:** Yes
- **UPC:** 4003019449361

Perfect For:

- Rework and repair projects requiring both soldering and desoldering capabilities.
- Electronics repair professionals and technicians who need to manage a variety of soldering tasks.
- Micro and nano soldering tasks in environments where precision and speed are critical.
- High-frequency rework operations that require both efficiency and accuracy.

The Weller WT2023M is your go-to dual-channel rework soldering kit for precision, speed, and flexibility. With fast heat-up times, the ability to manage multiple tools, and the option to handle a wide range of applications, this 150W soldering station is a perfect fit for professionals seeking to boost their productivity and streamline their soldering operations.

Order your Weller WT2023M Rework Kit today for top-quality performance and superior soldering results!
