

# Weller WTP 90 Soldering Iron 90W

SKU: GW-WTP90

## Features & Benefits

- ◆ **Heat-Up Time:** Fast 7-second heat-up time (50°C to 350°C / 120°F to 660°F) for increased productivity and reduced downtime.
- ◆ **Tip Compatibility:** Compatible with XNT and XH tips (with adapter), giving you a wide variety of options for different soldering tasks.
- ◆ **Quick Tip Change:** The quick-change heating element allows for efficient work with multiple tip types in quick succession, increasing versatility and convenience.
- ◆ **Compatible Power Units:** Works seamlessly with the WT 1 and WT 1H power supply units.

## About the Weller WTP 90 Soldering Iron 90W

The Weller WTP 90 is a 90W temperature-controlled soldering iron designed for professionals seeking high performance and rapid response.

Equipped with Weller's Power Response Heating Technology, this soldering iron is ideal for precise soldering tasks that require fast heat-up and quick tip changes.
