

# Weller WT 1010H Soldering Station

SKU: GW-WT1010H

## Features & Benefits

- ◆ **WP 120 Soldering Iron:** The 120W high-performance soldering iron with a power response tip for versatile and precise soldering tasks.
- ◆ **XT Tip Family Compatibility:** Compatible with the XT tip family, providing flexibility and efficiency for all soldering needs.
- ◆ **Stackable Design:** The WT 1010H station can be stacked with other WT series stations to optimise workspace and maximise efficiency in compact environments.
- ◆ **Inclined Display:** Features a newly designed inclined display that offers a natural viewing angle, reducing strain and improving usability.
- ◆ **Clear Graphics:** The display's clear, easy-to-read graphics make adjusting parameters simple and intuitive.
- ◆ **Uncluttered Control Panel:** A minimalist front panel design ensures easy access to all key controls for streamlined operation.
- ◆ **Menu Button for Easy Navigation:** The menu button allows effortless navigation through the settings, making the soldering process as smooth as possible.
- ◆ **Environmentally Friendly and Cost-Effective:** Designed with sustainability in mind, this soldering station offers long-lasting, reliable performance at a reduced environmental impact and lower total cost of ownership.
- ◆ **ESD Safe:** Protects ESD-sensitive components from electrostatic discharge (ESD), ensuring safe operation in electronics manufacturing and other static-sensitive environments.
- ◆ **CLICK HERE FOR XT Soldering Tips** As part of the innovative WT line, the Weller WT 1010H Soldering Station is designed to be user-friendly, with easy operation and environmentally conscious features that reduce the overall cost of ownership
- ◆ The display also features clear graphics, which allow for quick, intuitive operation, while the uncluttered control panel ensures all important operating elements are easily accessible

## About the Weller WT 1010H Soldering Station

The Weller WT 1010H Soldering Station offers a high-performance soldering solution with a 120W power response tip for universal soldering applications.

This set includes the WP 120 soldering iron (120W / 24V), XT B soldering tip, and the WSR 201 safety rest, making it ideal for both professional use and ESD-sensitive environments.

The WP 120 soldering iron is part of the XT tip family, offering superior heat response and precision for demanding tasks, ensuring that your soldering work is completed faster and with better results.

As part of the innovative WT line, the Weller WT 1010H Soldering Station is designed to be user-friendly, with easy operation and environmentally conscious features that reduce the overall cost of ownership. The station's stackable design saves valuable desk space, allowing multiple units to be stacked together. The inclined display offers a more natural viewing angle, making it easier to read and adjust settings. The display also features clear graphics, which allow for quick, intuitive operation, while the uncluttered control panel ensures all important operating elements are easily accessible. The menu button allows seamless navigation through the settings for ultimate convenience.

The Weller WT 1010H Soldering Station is a perfect choice for professionals looking for a high-performance soldering station with precision, reliable heat response, and user-friendly features. Its space-saving design, clear display, and cost-effective operation make it a great addition to any ESD-safe workspace. Whether used for electronics assembly, repair, or maintenance, this station provides the ideal balance of performance, durability, and convenience.

## Specifications

Property	Detail
Power Response Tip	120W
Application	ESD-protected areas, electronics mfg, cleanrooms
