

Weller WT 1010 Soldering Station

SKU: GW-WT1010

Features & Benefits

- ◆ **90W High-Performance Soldering Iron:** The WTP 90 soldering iron offers exceptional power and precision for universal soldering tasks.
- ◆ **Motion Sensor for Energy Efficiency:** Automatic standby mode activates when the soldering iron is not in use, reducing power consumption and prolonging tool lifespan.
- ◆ **Tool-Free Tip Change:** Change soldering tips quickly and easily without the need for additional tools, improving workflow efficiency.
- ◆ **Backwards Compatible:** Compatible with all WSD81i soldering irons, ensuring flexibility in your workspace.
- ◆ **Compatible with Weller Fume Extraction:** Works with Weller Zero Smog fume extraction units and soldering robots, making it suitable for advanced soldering tasks and maintaining a clean workspace.
- ◆ **WSR 2-in-1 Safety Rest:** Features both dry and wet cleaning options to maintain the soldering iron tip and extend the life of the tool.
- ◆ **Unique LC Display:** Provides a detailed overview of all functions, ensuring easy operation and control.
- ◆ **Power Bar Graph:** Visual monitoring of output power, allowing you to easily track performance and adjust settings as needed.
- ◆ **Lock Function:** Secures settings to prevent accidental changes, ensuring consistent soldering results.
- ◆ **Tip Compatibility:** Compatible with XNT & THM tip families, offering a variety of options for different soldering tasks.
- ◆ **1-Channel Digital Station:** Provides precise control with digital settings for enhanced soldering accuracy.
- ◆ The Weller WT1010 Soldering Station is a high-performance soldering solution, designed to enhance your workbench with advanced features and user-friendly functionality.

About the Weller WT 1010 Soldering Station

The Weller WT1010 Soldering Station is a high-performance soldering solution, designed to enhance your workbench with advanced features and user-friendly functionality.

With a 90W power station, this soldering station provides reliable heat response and precise control, making it ideal for universal use in electronics assembly, repairs, and other ESD-sensitive environments.

The WT 1 power unit is paired with the WTP 90 soldering iron, ensuring efficient soldering for all types of applications, from general soldering to more detailed tasks.

This soldering kit includes the WT 1 station, WTP 90 soldering iron, the XNT A soldering tip, and the WSR 2-in-1 safety rest.

CLICK HERE FOR XNT Soldering Tips

The WTP 90 iron is equipped with motion sensor technology, which enables automatic standby mode, ensuring energy efficiency and prolonging the life of your equipment. The soldering tips can be changed in seconds without the need for tools, allowing for fast and hassle-free maintenance. The WT1010 station is backwards compatible with all WSD81i soldering irons, making it a flexible addition to any workspace. Furthermore, it is compatible with Weller Zero Smog fume extraction units and soldering robots, making it a versatile tool for more complex soldering tasks.

The station features a unique LC display with a clear, detailed overview of all functions, including a power bar graph that shows the output power from the station to the soldering iron tip. The WSR 2-in-1 safety rest provides both dry and wet cleaning options, ensuring that your soldering iron is always in top condition.
