

# Weller WT 1012 Soldering Station

SKU: GW-WT1012

## Features & Benefits

- ◆ **WSP 80 Soldering Iron:** 80W high-performance soldering iron designed for universal use with a power response tip for precise and efficient soldering.
- ◆ **LT Tip Family Compatibility:** Compatible with the LT tip family, providing flexibility to choose the ideal tip for various soldering tasks.
- ◆ **Stackable Design:** The unit can be stacked with other WT line stations to save desk space, ideal for compact workspaces.
- ◆ **Inclined Display:** A new design that offers a natural viewing angle, making it easy to read and adjust settings.
- ◆ **Clear Graphics:** Provides intuitive and easy-to-understand settings, enabling quick adjustments for optimal soldering.
- ◆ **Uncluttered Front Control Panel:** All important controls are located on the front for easy access and a clean, user-friendly interface.
- ◆ **Menu Button for Seamless Navigation:** Easily navigate through the station's settings and options for maximum efficiency.
- ◆ **Environmentally Friendly and Cost-Effective:** Designed to minimise environmental impact while offering long-lasting, cost-effective performance.
- ◆ **ESD Safe:** Ensures safe operation in ESD-sensitive environments, protecting electronic components from electrostatic discharge (ESD).
- ◆ [CLICK HERE FOR LT Soldering Tips](#) Part of the innovative WT line, the Weller WT 1012 Soldering Station is not only easy to operate but also offers environmentally friendly features and cost-effective performance
- ◆ Whether you're working in electronics manufacturing, repair, or assembly, this soldering station offers all the features needed for precision and consistency in every task

## About the Weller WT 1012 Soldering Station

The Weller WT 1012 Soldering Station offers a powerful, high-tech soldering solution for universal use, featuring the WSP 80 soldering iron with an 80W power response tip.

This station is designed to handle a wide range of soldering applications with precision, making it ideal for electronics assembly, repair, and other ESD-sensitive environments.

The WSP 80 soldering iron is part of the LT tip family, offering excellent performance and flexibility for various tasks. It comes complete with the LT B soldering tip and the WSR 201 safety rest to ensure safe, convenient storage during use.

Part of the innovative WT line, the Weller WT 1012 Soldering Station is not only easy to operate but also offers environmentally friendly features and cost-effective performance. The station's stackable design allows multiple units to be placed on top of each other, saving valuable workspace. The inclined display offers a natural viewing angle, making it easier to adjust settings. The clear graphics on the display allow for quick understanding of settings and parameters, while the uncluttered front control panel ensures that all the key operating elements are easily accessible. The menu button provides an intuitive interface for seamless navigation through the station's menu structure.

The Weller WT 1012 Soldering Station is perfect for professionals looking for a high-performance soldering solution that offers reliable heat performance, user-friendly operation, and energy efficiency. Whether you're working in electronics manufacturing, repair, or assembly, this soldering station offers all the features needed for precision and consistency in every task. Its environmentally friendly design, stackable functionality, and intuitive display make it a great addition to any ESD-safe workspace.

## Specifications

Property	Detail
Power Response Tip	80W
Application	ESD-protected areas, electronics mfg, cleanrooms
