

Weller WT 1H Control Unit 150W, 230V

SKU: GW-WT1H

Features & Benefits

- ◆ 150W power output for demanding soldering tasks and high-performance applications.
- ◆ Single-channel configuration, perfect for electronics soldering and component repair.
- ◆ Graphical backlit LC-display for a detailed overview of all functions and settings.
- ◆ User-friendly menu button for quick and easy navigation through the system.
- ◆ Automatic standby mode to conserve power when not in use.
- ◆ Reduced footprint with stackable design, saving valuable workspace.
- ◆ Housing cover doubles as storage for tools and accessories.
- ◆ High functionality with support for a wide range of compatible soldering tools.
- ◆ 230V power supply operating at 50/60 Hz.
- ◆ Protection class: I for added safety.
- ◆ The station features a detailed liquid crystal display (LCD) that provides users with an easy-to-read overview of all key functions, which can be accessed quickly via the user-friendly menu button

About the Weller WT 1H Control Unit 150W, 230V

The Weller WT 1H Control Unit is a high-performance soldering station designed to meet the demanding needs of professional electronics repair and soldering applications.

Offering a powerful 150W power supply, this single-channel soldering unit provides exceptional versatility, supporting a wide range of tools for precise soldering and desoldering. The station features a detailed liquid crystal display (LCD) that provides users with an easy-to-read overview of all key functions, which can be accessed quickly via the user-friendly menu button.

This advanced unit offers automatic standby mode, which reduces energy consumption when idle, helping to conserve power. The stackable design of the Weller WT 1H ensures a reduced footprint, making it an ideal choice for space-conscious workshops and workbenches. The graphical backlit LC-display enhances visibility in various lighting conditions, while the housing cover doubles as storage for tools, providing added convenience and organisation.

Designed with high productivity in mind, the Weller WT 1H offers a 150W power output and is capable of powering a wide range of Weller soldering tools for high-quality soldering performance. The unit's 230V power supply and automatic standby mode make it an efficient and reliable choice for professional use.

Specifications

Property	Detail
Dimensions	149 x 138 x 101 mm (5.87 x 5.43 x 3.98 inches), weighing approximately 3.00 kg
Application	ESD-protected areas, electronics mfg, cleanrooms
