

Weller WT 1M Control Unit, 95 W, 230 V

SKU: GW-WT1M

Features & Benefits

- ◆ **Versatile Tool Compatibility:** Supports up to 12 different soldering tools, including both active and passive tip technologies.
- ◆ **Compact and Space-Saving:** Stackable design reduces workspace footprint while maintaining high productivity.
- ◆ **Intuitive User Interface:** Clear menu structure and graphical backlit LC display for easy operation.
- ◆ **Health-Safe:** Compatible with Weller ZeroSmog fume extraction units for safer soldering environments.
- ◆ **Flexible Application:** Suitable for micro desoldering and standard rework tasks, supporting a variety of tips and tools.
- ◆ **Energy-Efficient:** Designed for continuous workflow with minimal downtime, optimising productivity.
- ◆ **ESD Safe:** Prevents electrostatic discharge, protecting sensitive components.
- ◆ **Enhanced Functionality:** Includes features like OFF time, process window, lock function, and offset for precise control.

About the Weller WT 1M Control Unit, 95 W, 230 V

The Weller WT 1M Control Unit is a high-performance, single-channel soldering station designed to boost productivity in any workspace.

With 95 W power and exceptional heat-up times of just 3 seconds, it offers fast, efficient soldering for a wide range of applications, from small components to larger micro tasks.

Its compact design allows for easy integration into any workspace, and it can connect up to 12 soldering tools, ensuring versatility and cost-efficiency.

Perfect for professionals in electronics, medical, and aerospace industries, the WT 1M offers flexibility and precision, making it an indispensable tool for high-quality soldering and rework tasks.

Specifications

Property	Detail
Powerful Performance	95 W
Temperature	2°C
Application	ESD-protected areas, electronics mfg, cleanrooms
