

Weller WT 2M Control Unit 150W, 230V

SKU: GW-WT2M

Features & Benefits

- ◆ 150W power output with the ability to power two soldering irons (combined power of 200W).
- ◆ Backwards compatibility with Weller micro-soldering cartridge tip tools and many passive tip tools.
- ◆ Temperature stability and temperature lock for consistent, high-quality soldering results.
- ◆ Standby mode and auto setback for energy conservation and equipment protection.
- ◆ Password protection to preserve settings and prevent accidental adjustments.
- ◆ ESD safe with heat-resistant silicon cable for safe handling.
- ◆ Comprehensive range of accessories available for maximum versatility.
- ◆ Connectable to Zero Smog TL filtration units (WT Hub required) for a clean, safe soldering environment.
- ◆ Attractive price/performance ratio, offering best-in-class value.
- ◆ Compact dimensions and high performance for demanding soldering tasks.
- ◆ The station features temperature stability and a temperature lock, which helps protect soldering tips and components while maintaining precise temperature control
- ◆ Additionally, the password protection feature preserves settings, preventing accidental changes during operation

About the Weller WT 2M Control Unit 150W, 230V

The Weller WT 2M Control Unit is a high-performance soldering station designed to meet the demands of professional soldering and rework applications.

With 150W power output and the ability to power two soldering irons simultaneously (with a combined power of 200W), this multifunctional, 2-channel unit is perfect for high productivity and versatile soldering tasks. Backwards compatible with Weller's micro-soldering cartridge tip tools and many existing passive tip tools, the WT 2M offers excellent performance, easy handling, and long tip life, ensuring repeatable, high-quality soldering results.

The station features temperature stability and a temperature lock, which helps protect soldering tips and components while maintaining precise temperature control. Standby mode and auto setback functions contribute to energy conservation and equipment protection, making this unit an environmentally friendly and cost-efficient choice for professionals. Additionally, the password protection feature preserves settings, preventing accidental changes during operation.

With a comprehensive range of accessories, the Weller WT 2M offers maximum versatility, making it compatible with various Weller soldering tools. It can also be connected to Zero Smog TL filtration units (with the required WT Hub), ensuring a clean and safe working environment by removing soldering fumes. The Weller WT 2M provides the best-in-class price/performance ratio, delivering powerful, reliable soldering capabilities at an attractive cost.
