

Weller WXHAP 200 Soldering Iron / WDH30 SET

SKU: GW-WXHAP200-SET

Features & Benefits

- ◆ 200W heating output with 24V voltage for powerful and consistent performance
- ◆ Temperature range from 100°C to 550°C (200°F to 999°F) for a broad range of applications
- ◆ Internal parameter storage with zero tolerance for optimal temperature control
- ◆ Hot air flow ionic-free for clean, precise soldering and rework
- ◆ Blue LED light for improved visibility during use
- ◆ Max air flow rate of up to 20 l/min (depending on the tool) for efficient hot air rework
- ◆ RO4 & RO6 tips included for precision soldering and hot air tasks
- ◆ ESD-safe design to protect sensitive electronic components
- ◆ Safety rest WDH 30 with dry cleaner for safe storage and maintenance
- ◆ Tip family F, R, D, Q for a variety of compatible tips for different tasks

About the Weller WXHAP 200 Soldering Iron / WDH30 SET

The WXHAP 200 Soldering Iron / WDH30 Set is a powerful and versatile soldering solution designed for high-precision soldering and rework tasks.

Offering 200W of heating power and an extensive temperature range of 50°C to 550°C (200°F - 999°F), this set is perfect for a wide variety of soldering and hot air rework applications. With internal parameter storage, hot air flow ionic-free technology, and blue LED light, the WXHAP200 Soldering Iron ensures both precision and reliability for professional users.

This set is compatible with WXA 2 and WXR 3 power units, ensuring seamless integration into your work setup. Ideal for electronics professionals and rework technicians, the WXHAP200 Soldering Iron / WDH30 Set provides the power, precision, and safety needed for high-performance soldering in demanding environments. Whether you're working with delicate components or high-heat applications, this set delivers exceptional results.
