

Weller WXP 80 Soldering Iron - 80W, 24V

SKU: GW-WXP80

Features & Benefits

- ◆ **Heat-Up Time:** Reaches operating temperature in approximately 10 seconds, enabling faster work and reduced downtime.
- ◆ **Tip Compatibility:** Supplied with an LT soldering tip and compatible with the entire LT series of tips for versatile soldering options. **CLICK HERE for LT TIPS**
- ◆ **Technology:** Designed with Silver Line Heating Technology, ensuring rapid heat transfer and excellent thermal performance.
- ◆ **ESD Safe:** Built to protect sensitive components with full electrostatic discharge (ESD) protection.
- ◆ **Fast, Efficient:** Small and fast, this soldering iron is particularly suited for high-precision soldering jobs that require both speed and accuracy.
- ◆ **Exclusivity:** Operates only with Weller WX supply units, ensuring optimal performance and compatibility with WX series stations.

About the Weller WXP 80 Soldering Iron - 80W, 24V

The Weller WXP 80 Soldering Iron is an 80W, high-performance soldering tool designed for use with Weller WX stations.

It's ideal for fine soldering jobs where quick heat-up times and high heating demand are required.

Supplied with an LT Soldering tip - **CLICK HERE for the RANGE OF LT TIPS**

Note: The WXP80 soldering iron by Weller may only be operated together with Weller WX supply units.

Specifications

Property	Detail
Power	80W
Temperature Range	Adjustable from 100°C to 450°C (212°F to 850°F), providing flexibility for a range of applications
Application	ESD-protected areas, electronics mfg, cleanrooms
