

# Weller WXR 3030 Rework Station SET

SKU: GW-WXR3030

## Features & Benefits

- ◆ **3-Channel Multi-Tool Station:** The WXR 3030 provides a total output of 600 W, distributed across three channels, each capable of 200 W. This ensures simultaneous operation of multiple high-performance tools, making the station ideal for multi-tasking and efficient workflows.
- ◆ **Versatile Tool Set:**
  - ◆ WXHAP 200 Hot-Air Iron (200 W / 24 V) – Perfect for hot-air rework tasks like soldering and desoldering of surface-mount components.
  - ◆ WXDP 120 Desoldering Iron (120 W / 24 V) – Designed for horizontal desoldering tasks with a high power output for efficient heat transfer.
  - ◆ WXP 65 Soldering Iron (65 W / 24 V) – Suitable for general soldering tasks, offering precision and reliability.
  - ◆ WVP Vacuum Pick-Up – Helps with precise handling of small components and parts.
  - ◆ PDN Pliers – Designed for fine manipulation of components during rework.
  - ◆ Desoldering Nozzles – Offers flexibility in nozzle sizes for different applications.
  - ◆ Safety Rests (WDH 30, WDH 70, WDH 10) – Ensures safe storage and handling of tools during operation.
- ◆ **Advanced Power Management:** The WXR 3030's intelligent power management system ensures that the total available power is distributed efficiently across all connected tools. This dynamic allocation helps prevent tool overloads and guarantees optimal performance, even when multiple tools are used simultaneously.
- ◆ **Integrated Pumps:** The WXR 3030 features 2 integrated pumps:
  - ◆ High-performance pump for vacuum and hot-air operations, making it fully independent of external compressed air.
  - ◆ Separate vacuum pump for use with pick-up tools, enhancing flexibility and efficiency.
- ◆ **LCD Display and Easy Setup:** The LCD display shows all connected tools and their status, providing real-time feedback and easy configuration. Special functions can be set at the press of a button, ensuring a user-friendly experience.
- ◆ **Support for Large SMT Components:** The station is designed for soldering and desoldering of large SMT components up to 30 x 30 mm. Whether working with delicate components or larger, more robust parts, the WXR 3030 is adaptable to a wide range of applications.
- ◆ **ESD Safe:** The WXR 3030 Rework Station is ESD-safe, ensuring protection for sensitive electronic components and minimising the risk of electrostatic discharge.
- ◆ **Traceability Integration:** The WXR 3030 can be integrated into a traceability process, which is essential for maintaining control over production workflows and ensuring product quality in manufacturing environments.
- ◆ **Compact and Efficient:** Despite its high-power capabilities, the WXR 3030 features a compact design, making it easy to integrate into any workspace while still offering robust performance for various rework tasks.

## About the Weller WXR 3030 Rework Station SET

The Weller WXR 3030 Rework Station is designed to meet the demanding needs of professional soldering, desoldering, and hot-air rework tasks.

Whether handling large SMT components or working on intricate rework projects, the WXR 3030 offers the power, versatility, and precision required to tackle the most complex applications. This station is suitable for a wide range of industries, from electronics repair to manufacturing, offering high-performance tools, easy-to-use settings, and intelligent power management.

- **Multi-functional:** Ideal for soldering, desoldering, and hot-air rework, the WXR 3030 is a complete solution for a wide range of rework tasks.
- **Powerful and Flexible:** With 3 channels of 200 W power, it allows for simultaneous tool operation without compromising performance, making it suitable for high-demand applications.
- **Independent Air and Vacuum Pumps:** With integrated pumps, the station eliminates the need for external compressed air, providing a more streamlined and space-efficient setup.
- **Efficient Power Distribution:** The intelligent power management ensures tools operate efficiently, with the ability to distribute up to 600 W across multiple tools as needed.
- **User-Friendly and Reliable:** The intuitive LCD display and easy tool configuration make the WXR 3030 an excellent choice for both experienced technicians and new users.
- **ESD-Safe:** Protects your sensitive components with ESD-safe operation, ensuring safe handling during the rework process.

The Weller WXR 3030 Rework Station offers the performance, versatility, and precision needed for high-quality electronics rework. It provides powerful, reliable tools to handle a wide range of applications, from small-scale repairs to larger, more complex rework tasks. Whether you're working on fine-pitch components or larger SMT boards, the WXR 3030 is an ideal choice for professionals looking for a comprehensive rework solution.
