

Weller W 101 Soldering Iron 100W

SKU: GW-W101

Features & Benefits

- ◆ **Temperature Control:** Magnastat controlled for stable and consistent temperature regulation during soldering.
- ◆ **Supplied with CT6 E7 Tip:** Comes with the CT6 E7 soldering tip, ideal for general-purpose soldering tasks.
- ◆ **Durable and Reliable:** Built for long-lasting performance in industrial and professional settings.
- ◆ It features Magnastat control, ensuring precise temperature regulation and stable performance for various soldering applications

About the Weller W 101 Soldering Iron 100W

The Weller W 101 is a 100W line voltage soldering iron designed for high-performance soldering in industrial environments. It features Magnastat control, ensuring precise temperature regulation and stable performance for various soldering applications. The Weller W 101 Soldering Iron offers a powerful, simple solution for high-quality soldering, making it ideal for heavy-duty applications where consistent heat and performance are critical.

Specifications

Property	Detail
Power	100W
Voltage	230V
Application	ESD-protected areas, electronics mfg, cleanrooms
