

Wrist Strap Tester ESD

SKU: 106-100

Features & Benefits

- ◆ Portable Wrist Strap Tester for quick continuity checks
- ◆ Banana socket and 10mm stud for easy connection
- ◆ Standard testing range from 0.75 meg-ohm to 35 meg-ohm
- ◆ Green light for pass, with red lights for high resistance fail and low resistance fail
- ◆ Audible buzzer for fail alerts
- ◆ Customisable with backboards and multiple colours
- ◆ Manufactured to meet Council Directives 89/336/EEC
- ◆ CE approved for compliance with safety standards
- ◆ Featuring a banana socket and a 10mm stud, this easy-to-use tester is powered by a 9-volt battery

About the Wrist Strap Tester ESD

The Portable Wrist Strap Tester is a compact and reliable instrument designed to check the continuity of fitted wrist straps and cords.

To ensure accuracy, it is recommended that this product is re-calibrated and certified annually. Please call us on 01202 588900 and our team will be happy to arrange this for you.

Featuring a banana socket and a 10mm stud, this easy-to-use tester is powered by a 9-volt battery. With a standard resistance range of 0.75 meg-ohm to 35 meg-ohm, it ensures accurate testing of static discharge protection equipment.

If the resistance falls within this range, a green light indicates a pass, while two red lights signal either a high resistance fail or low resistance fail. An audible buzzer alerts you in case of failure, providing immediate feedback.

Customisable options, such as bespoke backboards and a range of colours for the instrument, are available on request.

Manufactured to the highest standards, the Wrist Strap Tester complies with Council Directives 89/336/EEC and is CE approved for guaranteed safety and quality.
