

Yellow and Black Hazard Marking Tape

SKU: G-TAPE-C

Features & Benefits

- ◆ Highly visible yellow and black colour for clear hazard marking
- ◆ Made from heavy-duty plasticised film with aggressive adhesive
- ◆ **Elongation at break:** 150% for flexibility and durability
- ◆ **Adhesion to steel and self:** 2.0N/10mm
- ◆ **Water extract pH range:** 6.0 to 8.0, Conductivity max 2.5mS/m
- ◆ **Shelf life:** 12 months for long-term reliability

About the Yellow and Black Hazard Marking Tape

Yellow and Black Hazard Marking Tape is designed for high visibility and optimal safety in EPA areas.

Made from durable plasticised film and coated with an aggressive pressure-sensitive adhesive, this tape provides reliable marking for hazardous zones and is suitable for a variety of industrial and commercial applications. With a width of 50mm and a length of 33 metres, it offers excellent tensile strength, elongation, and adhesion to steel and itself.

The tape is water-resistant, conductive, and operates effectively across a range of temperatures, ensuring it meets the highest standards for marking and safety.

Specifications

Property	Detail
Tape width	50mm
Thickness	0.15mm
Temperature	0°C
Application	ESD-protected areas, electronics mfg, cleanrooms
