

(Water Soluble) Flux Pen-Rework Wand 10ml

SKU: 390-151

Features & Benefits

- ◆ **Marker Style Pen:** Provides controlled, localised application of flux with ease.
- ◆ **Water Soluble Flux:** Requires post-soldering cleaning, easily removed with warm water and DI water rinse.
- ◆ **Eliminates Spray Bottles:** No more waste or mess – apply flux exactly where you need it.
- ◆ **Flux Capacity:** Contains 1/3 oz. (10ml) of water-soluble flux for multiple uses.
- ◆ **Ideal for Rework & Component Addition:** Perfect for precision work, offering a clean and controlled flux application for rework or adding components.

About the (Water Soluble) Flux Pen-Rework Wand 10ml

The (Water Soluble) Flux Pen - Rework Wand is a marker-style rework pen designed for the precise and controlled application of water-soluble flux around components before soldering.

Ideal for rework tasks or adding components, this pen eliminates the need for spray bottles, providing a more efficient and mess-free solution. Since water-soluble fluxes require post-soldering cleaning, simply wash the flux residue with warm water, followed by a DI water rinse, to ensure a clean finish.

This pen contains 1/3 oz. (10ml) of high-quality flux.

The mechanical nature permits a localised, controlled application of flux for rework or adding components
