2x Base Plates

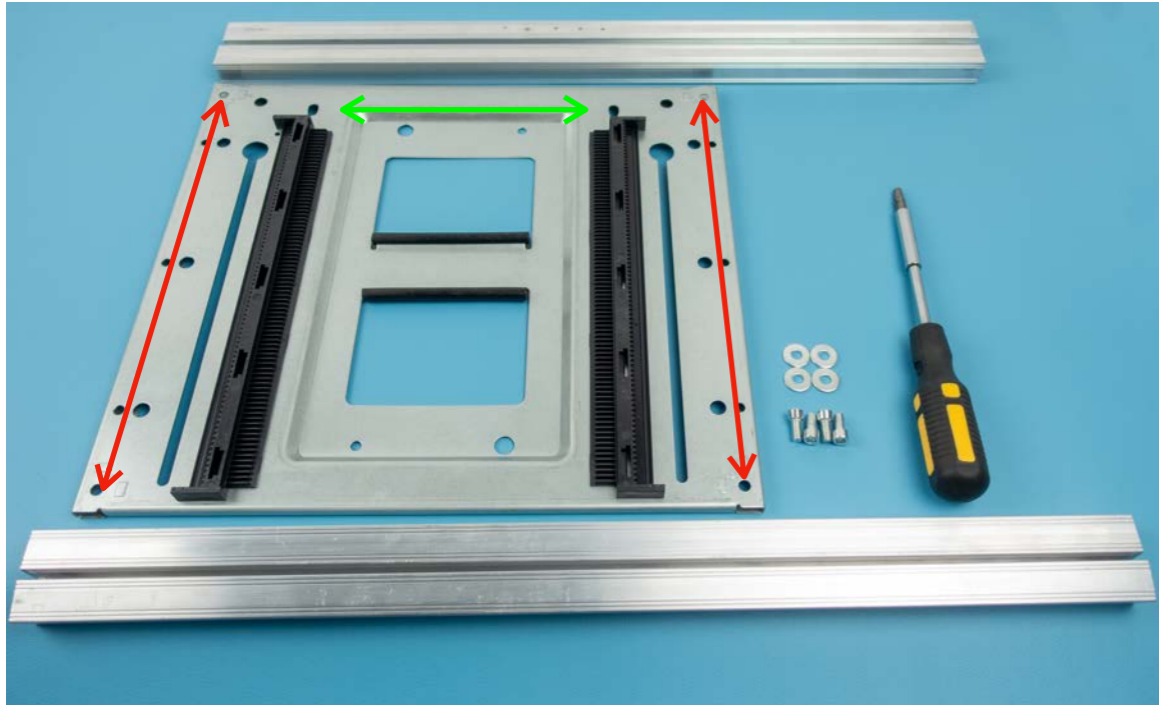

4x Pillars

1x Board Stop

12x M16x12 Hex Screws

12x Round Washers

Figure 1

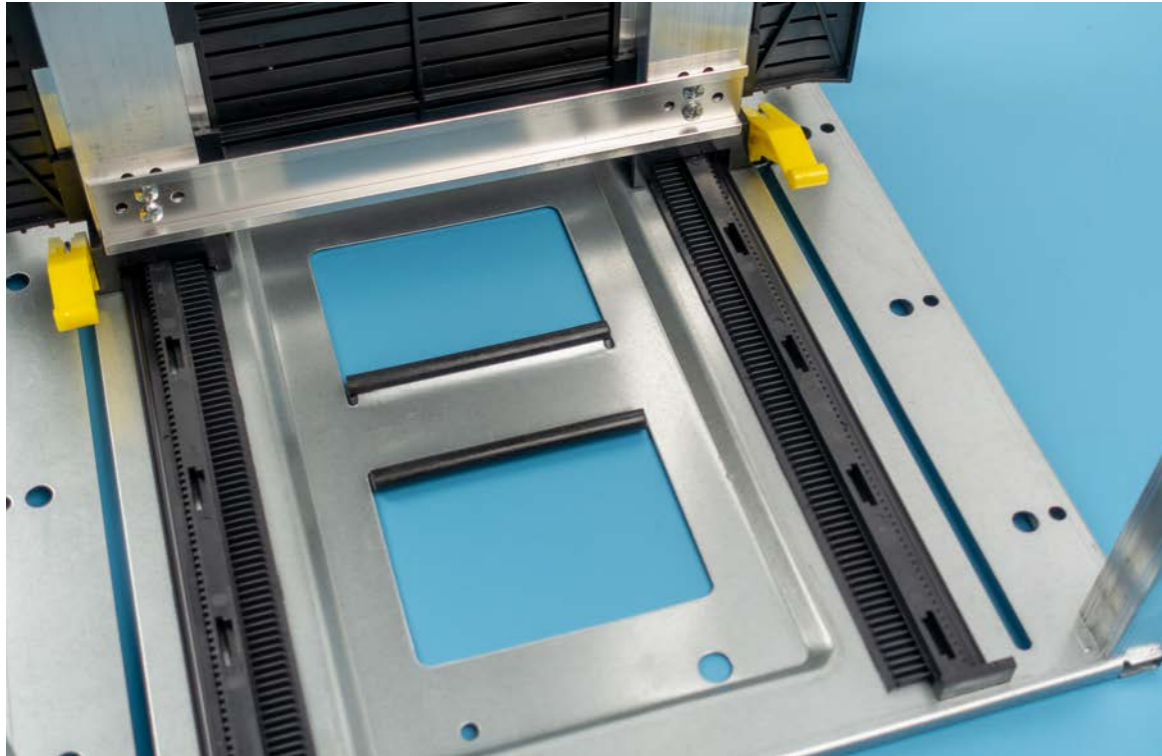

1. Attach the 4 pillars to the base plate using 4x washers and screws in the marked holes figure 1 (Red arrows)

Figure 2

2. Attach the fixed sideboard to the baseplate with 2x washers and screws in marked holes figure 1 (Green arrows)

Figure 3

3. Attach the adjustable sideboard.  
The round sliders (top and bottom ) fit in to the circular holes at the end of the track guide on the base plate. Pay attention to make sure the teeth are parallel and located on the 1st position on the rack.

Figure 4

4. Fit the second base plate to the pillars and sideboard loosely with 6x Round washers and Screws.  
REPEAT step 3 on second base plate.  
Make sure that the adjustable side board can move smoothly along the track.  
Once satisfied no adjustments needs to be made tighten the fixings.

Figure 5

5. Insert board stop to either the front or back fixing holes
