

# Static Dissipative Nylon Bristle Toothbrush

**The Brush has 0.3mm 0.010" Static Dissipative Nylon Bristle with a hand-laced aluminium handle.**

The ESD fibers are designed to dissipate static electricity, protecting sensitive electronic equipment from damage.

This high-quality brush has a 3 x 11 row configuration.

The Nylon fill material is hand-laced with stainless steel wire into its handle for maximum fibre retention.

Overall length: 165mm  
Bristle width: 7mm  
Bristle length: 30mm  
Bristle height: 12mm  
Scraper: Fine Cleaning  
Trim: 178mm

These brushes are popular for detail cleaning on items such as printed circuit boards and SMT assemblies, or for use as fluid applicators.
