

Weller®

RTPS Pico Soldering tip, conical bent 0.1 mm, MIL- SPEC

Item No: T0050110799

KEY FEATURES

- + For all Pico Applications with smallest Component Sizes:
Smart high-performance tips for the smallest component work under the microscope: 0402 to 01005 (XS to S)
- + Extremely Fast 3-Second Heat-up Time for Smallest Applications
- + Maximum Precision:
Short tip-to-grip distance and optimized tip shape provide maximum precision during the soldering process.
- + Clear Identification of Smart Tips
- + Full Process Control with Tip Lock Function
- + Full Traceability with Tip ID Number and Integrated Data Storage
- + Accurate Data Results with Tip-Offset Function
- + Fast, Safe and Easy Tip Exchange
- + Maximum Protection:
(IPC industry standards - TM-650 2.5.33)
- + Tool Compatibility:
For use with WXMPS MS smart soldering iron and WXsmart soldering station
